

Dear immigrant, do you want to study in Tavastia Vocational College / Ammattiopisto Tavastia?

You have the right to apply for all training programs that we plan to start (3.4.2023) starting in Tavastia Vocational College. The language of studying at the Tavastia Vocational College is Finnish. We test the Finnish language skills of foreign language applicants before selection. In this brochure, we have compiled planned trainings suitable for immigrants starting in the fall of 2023.

Basic education for adult immigrants

- You need more basic school skills to continue your studies in Finland or
- You have not accomplished primary school or
- Reading and writing in Finnish is difficult for you, then you can begin with literacy studies

Duration: personal

TUVA, preparatory education for vocational education / upper secondary school

You already know some Finnish and

- you don't know what to study in Finland
- you need additional skills so that you can get a job or study in vocational training / upper secondary school

Duration: August 2023–May 2024

Part of the vocational qualification and strengthening study skills

You already know a little Finnish, but you need to learn more so that you can start the entire qualification. You study Finnish and other parts of the qualification that strengthen your study skills (OPVA) and one part of the vocational qualification. After the training, you can apply for the next part of the qualification or the entire qualification.

In the fall of 2023, part-of-a-qualification training programs, that include a lot of Finnish language studies

- Property maintenance study program
- Construction/building study program
- Restaurant services study program
- Care assistant education
- Mechanical and production engineering
- Logistics study program
- Vehicle technology study program

Duration 9-15 months, beginning in August 2023
